Strain/Sprain and Overuse Injury Reduction Seminar & Overview of OSHA Interpretation regarding MSD's-first aid treatment

Attention:
Health and Safety Managers
Human Resource Managers
Industrial Hygienists
Corporate Nurses
Plant Managers
Risk Managers

Greatly reduce soft tissue injury expenses and OSHA recordable rates.

Cut worker's compensation costs by 50% to 70% in one year.

Learn why soft tissue injuries are so misunderstood.

Receive a copy of the relevant OSHA interpretation regarding MSD's and first aid.

Experience a complimentary sample ART soft tissue treatment

WHEN: **Tuesday, March 1, 2011**
TIME: Lunch served promptly at 12:00
Presentation 12:30 to 1:45
WHERE: **The Lamb**
865 West Springfield Road
Springfield, PA 19064 (610-544-3300)
COST: **Free with RSVP**

Speakers:

Brian Bodik: Health Educator specializing in corporate health promotion and wellness. Manager of ART Corporate Solutions programs for the mid western states. Past presenter at OSHA VPPPA conferences, ASSE national and regional meetings and National Safety Council Conferences. Manages a network of 3000 certified ART doctors and therapists.

Michael Tancredi: Philadelphia's' own Active Release Techniques® Soft Tissue Injury Specialist. Specializing in soft tissue treatment for a variety of conditions such as carpal tunnel syndrome, rotator cuff injuries, low back pain, plantar fasciitis, tennis elbow and various MSD's.

You Are Invited to the Upcoming Strain Reduction Seminar

Learn how 140 other companies have reduced soft tissue strains and overuse conditions by 50% to 70% at this informative luncheon.

Don't let low-back, shoulder, elbow, wrist, hand, or sciatica injuries impact your company's OSHA recordable rates and workers' compensation budget any longer.

Bring your aches, pains, and discomforts and stay after for a free sample ART treatment.

See the reverse side regarding how to sign up for this free educational luncheon.

There is a solution.
